

## Table of Contents

Introduction to Nagios.....	5	Understanding Nagios Objects.....	42
Overview.....	6	Nagios Contact and Contactgroup Objects.....	44
Common Use Cases.....	8	The Contact Object.....	45
Features and Functionality.....	9	Contact Example.....	49
Licensing Restrictions.....	10	Notification Options.....	50
Installing Nagios.....	11	The contactgroup Object.....	52
Installation Procedure.....	12	Exercises.....	54
Installing via RPM.....	14	Nagios Timeperiod Objects.....	56
Accounts & Security.....	16	Defining Time Periods.....	57
Creating Files & Directories.....	18	A Timeperiod Example.....	59
Installing Nagios from Source.....	19	Exercises.....	60
Installing Nagios Plugins.....	22	Nagios Macros.....	61
Configuring Nagios to Start on Boot.....	23	About Macros.....	62
Configuring the Web Interface.....	24	User-defined Macros.....	63
Exercises.....	26	Contact Macros.....	65
Creating & Understanding Nagios Configuration.....	27	Host Macros.....	67
Understanding nagios.cfg.....	28	Service Macros.....	74
Exercises.....	30	Summary Macros.....	80
Configuration File Format.....	31	Date/Time Macros.....	83
Configuring the Web Interface.....	32	Notification Macros.....	85
Determining the File Structure.....	40	Group Macros.....	87

Nagios Command Objects.....	89	Service Dependencies.....	135
Creating Command Objects.....	90	Escalations.....	137
Exercises.....	93	Host Escalations.....	138
Common Nagios Terms.....	94	Sample Host Escalation.....	140
Soft and Hard States.....	95	Service Escalations.....	141
Flapping.....	97	Exercises.....	143
Active vs Passive Checks.....	98	Managing & Configuring Plugins.....	144
Obsessive Commands.....	99	The Plugin Model.....	145
Freshness.....	100	Downloading & Installing Plugins.....	146
State Stalking.....	101	Monitoring Common Services.....	148
Event Handlers.....	103	Monitoring a Web Server.....	149
Host Objects.....	104	Exercises.....	150
About Host Objects.....	105	Monitoring SMTP Servers.....	151
Host Object Example.....	114	Exercises.....	152
Defining Host Groups.....	115	Monitoring IMAP & POP.....	153
Exercises.....	117	Monitoring PostgreSQL & MySQL.....	154
Creating Service Objects.....	118	Exercises.....	155
About Service Definitions.....	119	Monitoring Hosts Remotely.....	156
Creating the Service Object.....	120	Monitoring Switches & Routers.....	157
Service Object Example.....	126	Monitoring Host Internal Status.....	158
Configuring Service Group Objects.....	127	Remote Monitoring.....	160
Exercises.....	129	SSH Key Based Authentication.....	161
Adding Dependencies.....	131	Using the check_by_ssh Plugin.....	163
Host Dependencies.....	132	Exercises.....	164

Windows Monitoring.....	165	Exercises.....	181
Monitoring Windows Hosts.....	166	Leveraging Passive Checks.....	182
Installing NSClient++.....	167	Passive Checks.....	183
Configuring NSClient++.....	168	Generating CRITICAL Errors for Passive Checks.....	185
Configuring check_nt.....	171	The Nagios Service Check Acceptor.....	186
Verifying that NSClient++ is Running.....	173	Nagios and SNMP Services.....	187
Monitoring Uptime.....	175	Install NET-SNMP.....	188
Monitoring CPU Loads.....	176	Generating SNMP Traps.....	189
Monitoring Memory.....	177	Other SNMP Tools.....	192
Monitoring Disk.....	178	Creating Custom Plugins.....	194
Monitoring a Service.....	179	About Plugins.....	195
Monitoring a Process.....	180	Exercises.....	196
