

Table of Contents

Table of Contents.....	2	Configuring Routing using the ip Tool.....	54
Introduction.....	5	Managing Routes in the Routing Table	55
What this course is about.....	6	Creating Persistent Routes	56
SLES 9 Resources.....	7	Configuring the Hostname and Name Resolution	57
About SLES 9	9	Verifying the Network Connection with ping	58
Installing SLES 9	10	Verifying the Network Connection with traceroute.....	60
Performing the Base Installation.....	11	Configuring Network Services	63
Starting the Installation.....	13	Configuring DNS Server using BIND	64
The Installation Proposal	14	A DNS Dialogue.....	66
Partitioning the Hard Disk	15	Installing and Configuring BIND	68
Linux Device and Partition Names.....	19	Configuring a Caching-only Server.....	69
Changing YaST's Partitioning Proposal	21	Configuring a Master Server.....	71
Using the Expert Partitioner.....	22	Configuring Zone Database Files	73
Creating a Partition	23	Configuring Mail Exchange and CNAME Records	76
Logical Volume Management.....	29	Configuring Slave Servers	78
Managing EVMS Volumes.....	33	Configuring Clients to use the DNS Server.....	79
Managing RAID Configurations.....	34	Deploying OpenLDAP on SLES 9	81
Selecting Software for Installation.....	36	Installing and Configuring the LDAP Server	84
Configuring the Boot Loader.....	37	Adding Entries to the LDAP Server	85
Configuring the SLES 9 Installation.....	42	Adding Users to the Directory	86
Configuring the Network Manually.....	45	Querying the LDAP Server.....	86
Understanding Linux Network Terms	46	Querying the LDAP Server.....	87
Changing the Current Network Configuration	50	Deleting and Modifying LDAP Server Entries.....	88
Storing Device Configuration Manually.....	51	Configuring Apache (the Web Server)	89
Configuring a Static Address.....	52	Apache Configuration Files	92
