

# Web Development with Django

Version 1.0.2 (01/04/2009) [CG]

## Table of Contents

Introduction.....	5	About Templates.....	42
About Django.....	6	Template Fundamentals.....	43
Django Components.....	7	Creating Template Objects.....	44
Installing & Configuring Django Components.....	9	Loading Template Files.....	45
Django Pre-Requisites.....	10	Filling in Template Content (Context Objects).....	47
Downloading & Installing Django.....	11	Template Filters.....	50
Choosing a Database.....	12	Template Tags.....	51
Creating a New Project.....	13	More on For Loops.....	53
Exercises.....	15	Template Inheritance.....	55
Generating Simple Django Views.....	16	Easy Rendering of Templates.....	57
About View Functions.....	17	RequestContext Processors.....	58
Using Django's HttpResponse Class.....	18	Global Context Processors.....	60
Understanding HttpRequest Objects.....	20	Exercises.....	63
Using QueryDict Objects.....	23	HTML Forms with Forms	
Exercises.....	25	(formerly newforms).....	64
Configuring URLconf's.....	26	The Forms Module.....	65
About URLconf.....	27	Creating the Form.....	67
Regular Expressions.....	29	Generating Output From the Form.....	68
Expression Examples.....	32	Customizing Field Parameters.....	70
Simple URLConf Examples.....	33	Exercises.....	72
Using Multiple URLConf's.....	35	Processing Form Data.....	73
Passing URL Arguments.....	37	Custom Form Field Validation.....	75
Exercises.....	40	Generating Custom Field Errors.....	77
Django Templates.....	41	Customizing Form Output.....	78

Exercises.....	79	Exercises.....	123
Database Models with Django.....	80	Using Q Objects.....	124
About Database Models.....	81	Creating Forms from Models.....	125
Configuring Django for Database Access.....	82	Using the Django Admin Interface.....	127
Understanding Django Apps.....	84	Enabling the Admin Interface.....	128
About Django Models.....	86	Creating an Admin User.....	130
Defining Django Models.....	87	Access Control with Sessions and Users.....	131
Understanding Model Fields & Options.....	88	Cookies & Django.....	132
Table Naming Conventions.....	91	The Django Session Framework.....	134
Creating A Django Model.....	92	Sessions in Views.....	135
Adding the App to Your Project.....	95	Session Tuning.....	136
Validating the App.....	96	Installing Django User Authentication.....	137
Generating & Reviewing the SQL.....	97	Using Authentication in Views.....	138
Exercises.....	98	Login and Logout.....	141
Adding Data to the Model.....	99	Building your Own Login/Logout Views.....	142
Primary Keys and the Model.....	101	Authentication Decorators.....	144
Simple Data Retrieval Using a Model.....	103	Adding & Deactivating Users.....	147
Understanding QuerySets.....	104	Asynchronous Messaging.....	149
Applying Filters.....	105	Managing Permissions.....	150
Specifying Field Lookups.....	106	Generic Views.....	151
Lookup Types.....	108	Simple Generic Views.....	152
Slicing QuerySets.....	112	Using Generic Redirects.....	154
Specifying Ordering in QuerySets.....	113	Other Generic Views.....	155
Common QuerySet Methods.....	114	Create/Update/Delete Generic views.....	157
Deleting Records.....	116	Creating Syndication Feeds.....	158
Managing Related Records.....	117	About Syndication.....	159
Retrieving Related Records.....	121	AJAX Integration with Django.....	162

AJAX with Django.....	163	Sending Email.....	173
Data Caching for Performance.....	164	Other Email Functions.....	174
Data Caching.....	165	Deploying Django Applications.....	175
Setting up Per-View Caching.....	166	Deploying to Apache.....	176
Site Caching.....	167	Using ReportLab for PDF Generation.....	178
Preventing Cross Site Request Forgery.....	168	About ReportLab Toolkit.....	179
Cross Site Request Forgery.....	169	Questions?.....	181
Django's Email Functionality.....	170	Where to Get Answers/Next Steps.....	182
Configuring Mail Settings.....	171
